

# Perry's Solutions, LLC

Quarterly Newsletter

February 2022

Welcome to our quarterly newsletter. Since 2009 we have prided ourselves on providing you with clear and concise information that can be implemented in your daily operations. If you receive value from this, please share with a colleague.

## PROCESS FEASIBILITY PRESENTATION

Feasibility and Process Design increase the likelihood of a strong product launch. "Can you do this" should not just be given a yes/no answer. <https://bit.ly/3miNFJe> This TopCon presentation discusses the key considerations related to understanding requirements and process representation. This will provide a better assessment before detailed process development. Call us to reduce your project risk and hit your deadlines.

## EVOP VIDEO

EVolutionary OPERations (EVOP) was first created by George Box in the 1950s. It is useful when key material inputs vary over time, such as the chemical industry. Adapting our settings and noting performance changes, we can maintain peak performance. <https://bit.ly/1kjKvh5> The methodology is simple, focusing on key variables. If your process may fit this application, call us to install EVOP for immediate benefit.

## FUTURE BOOK TOPICS

Many tools and approaches have matured through our product development experiences. They have evolved in a variety of industries and environments. In the next several newsletters, we are going to discuss a few book ideas we have drafted to share this content. The intent is to gain your feedback and prioritize ideas. Topics include networking, starting a new business, key life lessons and the Design of Experiments (DOE) process. Let us know if you have a topic we should address or something to include. Anticipate the listed topics and be ready to share your thoughts with us!

Have a great day!
