

Perry's Solutions, LLC

Quarterly Newsletter

August 2023

Welcome to our quarterly newsletter. Since 2009 we have prided ourselves on providing you with clear and concise information that can be implemented in your daily operations. If you receive value from this, please share with a colleague.

RISK MANAGEMENT LESSONS LEARNED – MDM TALK

After release of the new ISO Risk Management standard, we helped organizations with implementation. This includes updating procedures, modifying templates and doing training in a workshop format to understand this new thinking. The MDM conference asked us to present <https://bit.ly/44Dw9TA> our learning with the medical device community. The lessons apply to all industries to improve product development.

DESIGN NEWS COLUMNIST - REQUIREMENTS

Our broad experiences from Corporate America, graduate engineering teaching and consulting provided many lessons. We have been able to share these with clients during projects and training classes. Recently, *Design News* asked if we would be a regular columnist and provide mechanical engineering expertise and perspective. We have published full length articles several times before, so are excited for the opportunity to share in this manner with greater frequency! Here is the first: <https://bit.ly/3MBvkCu>.

THE FOUR AGREEMENTS – BE IMPECCABLE WITH YOUR WORDS

The first section of “The Four Agreements” book focuses on “Be impeccable with your words.” It is about being precise with our words. About being productive in our words. Most importantly, it is to be done with ourselves and others. Why does this matter for product development? We need to understand the words used and speak with integrity. Different interpretations can lead to delays and waste our investment. It is best for the team to have trust and confidence in each other. It begins with our words and actions.

Have a great day!
